STREET LIGHT INSTALLATION PROCESS

In existing residential areas, if you or a group of residents desire to have a new street light installed, the process is listed below. The costs involved are the responsibility of the resident or residents making the request. This cost includes the installation of the light and wiring and ranges from \$1,500 to \$2,000 per light requested.

1. A Parking and Traffic safety Committee (PTSC) Form will need to be submitted.
2. Determine if there is a PG&E utility pole nearby.
3. A petition from the residents living within the vicinity where the light is requested, agreeing to the installation of the street light should be submitted to the PTSC. The item will be placed on a future PTSC meeting agenda for approval.
4. If approved, PG&E will be contacted for a final cost estimate and schedule for installation.

If you would like to move forward with the process, please contact Public Works at 650-595-7425 and we can assist you with the process.
